

ABOUT US

The Solar World Stain is a Spanish business group based in Tokyo, Madrid and Albacete that

develops, builds and operates photovoltaic solar energy projects in several countries.

The group started in May 2012. The shareholders are companies with extensive experience in the renewable energy sector as developers, builders, sponsors, owners and operators

of wind facilities, solar photovoltaic plants and the management team has over 20 years of experience in the energy sector.

Our company has grown significantly since its foundation, developing a portfolio of 1400 MW projects, performing maintenance on important photovoltaic plants and public and private installations, public lighting installations, thermographs, IV curves, photovoltaic self-consumption installations, execution of low-voltage lines and high voltage, both underground and overhead.

OUR GOAL

The main goal of Solar World Stain is to offer our customers a high quality service.

Solar World is a company committed to our environment, we focus all our work on site and in the office to reduce the carbon footprint generated. We have as a priority respect for our environment.

We work in a daily basis to increase our business volume in a responsible and proactive way, opening new national and international markets, developing a portfolio of projects in various countries.

Solar World Stain builds solar energy projects, counting with the necessary human resources, thanks to our specialized staff with extensive experience in executing installations. We also have our own mechanical means, with screwdrivers for direct driving of profiles, drilling, assembly of metal structures and photovoltaic modules..

Construction of civil works, trenches, fencing, foundations, accesses, as well as the electrical installation, laying and connection of DC, AC and MV cables. Including all necessary tests, mechanical and electrical ones: pull tests, I-V curves, thermographs, cable loops, ground tests.

We carry out the complete construction of the installation to deliver to the customer a fully tested installation ready to operate.

4

OUR DEPARTAMEN TS

Execution of high and low voltage electrical installations.

Self-consumption facilities.

Solar World Stain has a department of personnel and technicians specialized in the study, planning, management and execution of LV and HV electrical installations. SWS also has a number of collaborating companies to offer our customers an end-to-end service.

Solar World Stain is a dynamic company capable of adapting to specific customer needs due to the wide range of activities we perform.

Main activities that we perform:

- Low Voltage Installations in homes, premises, garages, offices....
- Assembly and installation of general distribution panels, secondary panels
- Outdoor, indoor or compact Transformation Centers
- High and Medium Voltage Overhead and Underground Lines
- Grounding Installations
- Public Lighting Systems
- Location and repair of electrical installations.
- Installation of PV panels, inverters, batteries, capacitors, etc.

OUR DEPARTAMEN TS

MAINTENANCE

High and low voltage, preventive and corrective installations.

Thermography.

I-V Curves

SWS offers the performance of routine inspections, tests and services to electrical equipment through preventive and corrective maintenance. Also be able to detect, reduce or eliminate imminent problems in such equipment.

At Solar World Stain we have extensive experience in Thermography and thermal imaging cameras. In addition to study Solar Photovoltaic Plants and Electrical Installations. For the improvement of the Energy Efficiency, having Thermography and last generation thermographic cameras of high resolution 160x120pxl. Being suitable for use in industrial and construction field. Therefore, allowing us to carry out energy certifications.

We can perform advanced analysis including points, lines, areas and isotherm on each image. Also the detection of electrical problems, control of mechanical parts, analysis of hydraulic systems, forced ventilation, etc ...

We make I-V analysis curves in photovoltaic installations verifications. We have the necessary multifunction necessary multifu

ENGINEERING

Facilities management, Engineering and Consulting.

development

and

commissioning.

Carrying out a study, analysis and advice for the development and start-up of each project, elaborating all the documentation such as, Reports, Quality, Regulations, Records, Request management ...

NUESTROS DEPARTAMENTOS

IBERDROLA CUSTOMER SERVICES

Assistance and management of electrical supplies and portfolio management.

Iberdrola Customer Service Point.

Solar World Stain has signed a collaboration contract with Iberdrola, providing personalized service to individuals and companies at our Customer Service offices. We manage electricity and gas supplies for homes and SMEs, registrations and file management with the distributor. Optimization of supplies and savings solutions for our clients.
